

## PRESS RELEASE

June 30, 2020

### **Town of Pelham Clean Water Initiative**

The Town of Pelham takes our water quality very seriously. In our effort to comply with new stormwater management requirements mandated by the EPA Clean Water Act, the Town is embracing that challenge in the spirit of maintaining our most precious resource...clean water.

You will see several mailings and social media campaigns with educational messages to our citizens, businesses, developers, and those engaged in construction activity encouraging best practices to prevent stormwater from negatively impacting our surface and groundwater (well) supplies. Look for this logo on these messages and you will know the purpose for the outreach is to help all of us be more aware and effective in the way we manage our own personal impacts to water quality and how to ensure we **keep our water clean!**

If you have any questions or would like to learn more, please contact Jeff Gowan, Planning Director at 603-508-3084 or at [jgowan@pelhamweb.com](mailto:jgowan@pelhamweb.com)
